

SOP: In order to re-trigger the Autosys jobs in order for given dates

1. Run the following code snippet to rerun the Autosys job -

```
#!/bin/bash
```

```
# Set the Autosys job name
```

```
JOB_NAME="your_job_name"
```

```
# Set the Autosys box name if the job is inside a box
```

```
BOX_NAME="your_box_name"
```

```
# Set the Autosys event server name
```

```
EVENT_SERVER="your_event_server"
```

```
# Set the Autosys event port (default is 9000)
```

```
EVENT_PORT="9000"
```

```
# Send the FORCE_STARTJOB event to the job
```

```
sendevent -E FORCE_STARTJOB -J "$JOB_NAME" -S "$EVENT_SERVER" -P "$EVENT_PORT"
```

```
# If the job is inside a box, send the FORCE_STARTJOB event to the box as well
```

```
if [ -n "$BOX_NAME" ]; then
```

```
    sendevent -E FORCE_STARTJOB -J "$BOX_NAME" -S "$EVENT_SERVER" -P "$EVENT_PORT"
```

```
fi
```
